

# 2014-2015 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 19, May 10<sup>th</sup>, 2015– May 16<sup>th</sup>, 2015)

## **Highlights**

- In week 19 of 2015, local flu activity indicator trends were mixed, but activity has generally returned to early season levels.
- Geographic activity and local intensity designation (Click <u>here</u> for definitions) = LOCALIZED, LOW
- Local medical facility labs reported 476 tests run with 20 (4.2%) positive results for week 19 of 2015. This is higher than last week's 3.0% and is slightly lower than the weekly baseline.
- The percentages of ED visits for both influenza-like-illness (ILI) and respiratory symptoms were stable compared to week
   The percentages of ED visits for ILI and respiratory symptoms are just slightly above to their respective weekly baseline averages.
- In week 19 of 2015, trends for the local over-the-counter medication sales tracked generally decreased (decrease in cough and cold, electrolyte, chest rub, pediatric anti-fever, adult anti-fever and throat lozenge sales; increase in thermometer sales) compared to last week.
- Nationally in week 19, influenza activity continued to decrease. Please <u>visit the CDC website for specific information</u> (National data is usually updated on Friday of each week).

## Local Flu Activity Dashboard (All data are preliminary and may change as updated reports are received.)

<sup>&</sup>lt;sup>3</sup>Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

<sup>&</sup>lt;sup>4</sup>Data Source: athenaHealth, Inc. and their analytics and research team athenaResearch (www.athenahealth.com). Rate of ILI visits to Franklin County, OH, athenaHealth network's primary care practices/physicians using claims data.

<sup>&</sup>lt;sup>5</sup>Data Source: Google Flu Trends (www.google.org/flutrends), City = Columbus, OH. See website for additional details.

<sup>&</sup>lt;sup>6</sup>Franklin County, OH residents only (based on zipcode).

<sup>&</sup>lt;sup>7</sup>Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

#### CDC 122-Cities Mortality Reporting System: Pneumonia and Influenza (P&I) Mortality

In week 19 of 2015, 5.9% of all Columbus deaths were attributed to pneumonia and influenza. Nationally, 6.0% of deaths reported were attributed to pneumonia and influenza in week 19. This national percentage is below the national epidemic threshold of 6.6% for week 19.

#### Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 19, the preliminary local influenza-like-Illness (ILI) visit rate to athenaHealth providers (1.1 per 1,000 visits) increased slightly compared to the previous week and is similar to the baseline average for the week (Figure 1). The week 19 percentage of Emergency Department (ED) visits for ILI symptoms was similar to the previous week (Figure 3) and is slightly higher than the historic baseline for the week. Pediatric urgent care visits for ILI symptoms decreased compared to the previous week and is below the historic baseline for the week.

Nationally, during week 19 of 2015, 1.3% of patient visits reported through the US Outpatient Influenza-like Illness Surveillance Network (ILINet), were due to influenza-like illness (ILI). The percentage is below the national baseline of 2.0%.

### **Laboratory Surveillance**

During week 19 of 2015, reporting Franklin County sentinel medical facility laboratories tested 476 specimens, with 20 (4.2%) positive (Figure 4). The total n umber of tests done by local reporting labs from week 35 of 2014 through week 19 of 2015 is 44,923 with 6,844 (15.2%) positives (5,236 type A, 1,580 type B, 24 both A and B, 4 type unknown).

Nationally in week 19 of 2015, WHO and NREVSS laboratories reported 6,533 specimens tested for influenza viruses, 228 (3.5%) of which were positive (visit the CDC website for more info). The last 3 weeks available national breakdown by type and subtype from the CDC is shown in Table 1 below:

Table 1: U.S. Virologic Surveillance (WHO and NREVSS participating labs)

Week	A Total	A (H1)	A 2009 H1N1	A (H3)	A (H3N2v)	A (unable to sub-type)	A (Subtyping not performed)	B Total	Total # Tested	% Positive

ODH lab results for Ohio cases that are PCR positive for seasonal influenza during the 2014-15 season. Positive results: (2) A/pdmH1N1; (1009) A/H3N2; (59) Influenza B; (1) A/H1N1v (through 05/16/15).

#### **ED and Pediatric Urgent Care Respiratory Visits**

In the 19<sup>th</sup> week of 2015, the percentage of all ED visits categorized as *respiratory* was similar to the percentage seen the previous week and is slightly above its historic baseline for the week (Figure 5). The percentage of Pediatric urgent care visits for respiratory symptoms decreased compared to the previous week, and is similar to its historic baseline for the week.

#### **Over-the-Counter (OTC) Medication Sales**

In week 19 of 2015, trends for the local over-the-counter medication sales tracked generally decreased (decrease in cough and cold, electrolyte, chest rub, pediatric anti-fever, adult anti-fever and throat lozenge sales; increase in thermometer sales) compared to last week.
